METIQUE TEA TREE OIL
HYGIENIC SKIN WASH

What's in my Bathroom...?

I love nosing around other people's products to see what they are using, so thought I would show you the products that are currently sitting in my shower /bath at the moment. I interchange constantly between products...I often swap shampoos / conditioners / cleansers depending on how I'm feeling! Here are my flavours of the month:

PRODUCT REVIEW Laura Lou Makeup

Monday, 15 April 2013
METIQUE TEA TREE OIL
HYGIENIC SKIN WASH

Metique Tea Tree wash: This is a really great wash for the face/body. I am using it for both as I have been having a few spots on my back - yuk! Not a good look with the impending summer. This is sulphate free too which for me, is what I am starting to look for in cleansers. Sulphates are foaming agents and can be reactive on some people's skin. As I am a little bit breakout I am trying to reduce the products I am using with sulphates. This has quite a high concentrate of tea tree oil in it so that's what it smells of. It makes me feel really nice and clean. A great face/body wash for sensitive and breakout skins.

Full review to come.
