

Metique Tea Tree Oil Products

Should it be all about 'FREE FROM'

All Metique skincare products are Formulated with Vitamin E and Paraben Free.

Being focused on "Free From" is in my opinion not always a good base for choosing a cosmetic. You should choose a cosmetic for the ingredients they contain as it can be those ingredients that may make a difference to your skin and health. Therefore the most important aspect for a consumer is to have a full declaration of ingredients in the product and to understand what each ingredient can do for them. By law all cosmetics have to list all ingredients and **METIQUE Tea Tree Oil** products has all ingredients listed. It is not a problem for the consumer to read the ingredients list to check to see if there is any silicone derivatives, petrochemicals, etc. in the product. So as a word of caution, claims like "free from" can be used purely for marketing and emotions. It may have nothing to do with the quality of the product in terms of efficacy and safety for the consumer.

METIQUE®

METIQUE® - the Specialists in Tea Tree Oil Products

With the increase in allergies and health concerns the value of our research and development is paramount and with this knowledge Metique tea tree oil products are formulated with natural Vitamin E and free from paraben's. Metique continues to invest in research and development working closely with specialists in this unique field.

Metique Tea Tree Oil Products

Information on Metique Ingredients

There is no petrochemicals in Metique Tea Tree Oil products but we do have silicone's (which are synthetic polymers)

To see how it is made see link below

<http://en.wikipedia.org/wiki/Silicone>

There are some cosmetic manufacturers who make the claim "all natural" and still have silicone in them, they claim it is natural because the mineral silica is used in the manufacturing process!! .

Dimethicone is the INCI ingredient name. A small amount of dimethicone is in our lotion, shampoo and conditioner to improve the "emollient feel".

I think there are probably more cosmetics on the market with silicone than without, especially moisturisers and conditioners.

The newest head lice treatments are 90% silicone oil.
