What Metique Say: "We can all suffer from problematic skin from time to time including spots, pimples, blackheads, whiteheads, bumps, boils, bites, blemishes, stings, scratches & grazes. Metique 10% Blended Australian Tea Tree Oil is here to help by offering a natural, gentle healing aid that will gently treat the problem and not dry out the skin. The Metique Blended Tea Tree Oil is a great alternative to a spot stick and a real Hero product in the Metique Tea Tree range. Tea Tree is known for its natural antiseptic qualities and will kill bacteria without harming the normal skin micro-organisms." **Price:** The bottle I received contains 25ml of product and retails for £7.14 on the [Metique Website](http://www.teatreeoilproducts.co.uk).

METIQUE®

METIQUE® - the Specialists in Tea Tree Oil Products

10% BLENDED TEA TREE OIL

Packaging: The product comes in a small little bottle, much like a medicine would, which to me, makes the product feel a lot more like a treatment for a problem, rather than something just for a bit of a pamper. It's very professional and I feel like the product is safe from leaking due to it's secure lid.

Pros: A little goes a long way so the bottle will last a while. Helps to clear up spots. Has antiseptic properties. Professional, secure packaging.

Cons: Stinging can occur if too much is used so be careful!

Overall: I love this product. It's the only spot treatment I've used that's given me visible results within days. It dries out the spots without causing any further problems to my skin. Not only has it been great for my blemishes, but it's come in handy for cat scratches and little bites as it has natural healing properties. I think it's a brilliant product that's handy to have in your first aid box, or if you're someone like me who suffers from problem skin, in your skincare routine.

Have you tried Tea Tree Oil?

What did you think of it?

Metique 10% Blended Oil

Raspberryykiss

My Thoughts: I'll be honest, this stuff is fantastic for clearing up spots within a few days. Not only that, but it does so hygienically due to it's antiseptic properties. As this is 10% blended, it means you can apply directly onto the skin without having to worry about diluting it. But only a little amount is needed as this stuff is still strong and if too much is applied, it can cause a slight stinging sensation which is uncomfortable. Although when the right amount is applied it does it's magic without any irritation I personally like to apply it right before bed onto freshly washed, clean skin.
