

METIQUE®

100% Pure Tea Tree Oil

Metique Pure Tea Tree Oil

Provides the powerful qualities of *Melaleuca alternifolia* (Tea Tree Oil). Tea Tree Oil is the strongest natural, broad-spectrum antiseptic known and is a fresh, high quality oil possessing strong bactericidal, fungicidal, virucidal, anti-inflammatory and anaesthetic qualities. Like the quality of water, the quality of the oil can change dramatically depending on the source of the tea trees; where and how they are grown and how the oil is distilled, stored and used.

Metique only uses Tea Tree Oil from plantations that comply with organic farming techniques and Pharmaceutical quality standards. The oil is tested for traces of heavy metal, pesticides and herbicides. The oil is thoroughly analysed through gas chromatograph test to ensure the composition of the oil conforms to Australian and International standards. Each batch of oil is tested for its anti-microbial efficacy.

Tea Tree Oil is the only known antiseptic that has the ability to control pathogenic micro-organisms, meaning it's the only antiseptic that's safe to use daily.

Directions:

To be used on minor areas of the skin. If used on a larger skin area dilute the pure Tea Tree Oil with water 1:10.

Only for external use.

Application:

- ✓ Acne
- ✓ Ingrown hair
