

METIQUE®

The Original Tea Tree Oil Crème Wax

Metique the Original Tea Tree Oil Crème Wax has been founded on the original formulation and made for Tea Tree Oil Products Limited by the original manufacturer of the very first Tea Tree Wax on the market. Based on UK market sales of ½ million units.

A smooth, non sticky, non tacky crème wax, with the antiseptic qualities of Australian Tea Tree Oil for hygiene, less trauma and after shock effects.

This wax when applied will glide on to the treatment area in the appearance of watered down milk, adhering to the hair opposed to the skin, offering a more comfortable and less traumatic experience and treatment.

Directions:

1. We recommend you to empty contents into the heater. This product is not recommended to be heated in a microwave.
2. Apply Pre Wax Cleanser prior to waxing application.
3. Using a spatula, and following direction of hair growth, spread a thin layer of warmed wax over the treatment area. The thinner the application the better.
4. Apply your preferred waxing strip and remove wax as trained.
5. Apply Metique™ After Wax Lotion 5% to the treated area immediately after waxing for optimum salon results.
6. The skin will feel instantly cooled, relieved, the area is sanitised and redness and after shock is dramatically reduced.
7. Metique™ After Wax Lotion (Retail) ideally recommended for home care for the prevention of infection, in growing hairs and skin care maintenance.

Application:

Professional Hair Removal

For an optimum waxing treatment use Metique™ Pre Wax Cleanser prior to waxing application and Metique™ After Wax Lotion after Hair removal.#
